

How to print double-sided flashcards

Dear PC Ukraine invitees. There are two simple rules how to learn a language quickly. The first is: You do not have to practice language every day, but only on the days you eat. The second is a “ten seconds” rule. You should be able to reach your language learning materials within ten seconds any moment you think of them.

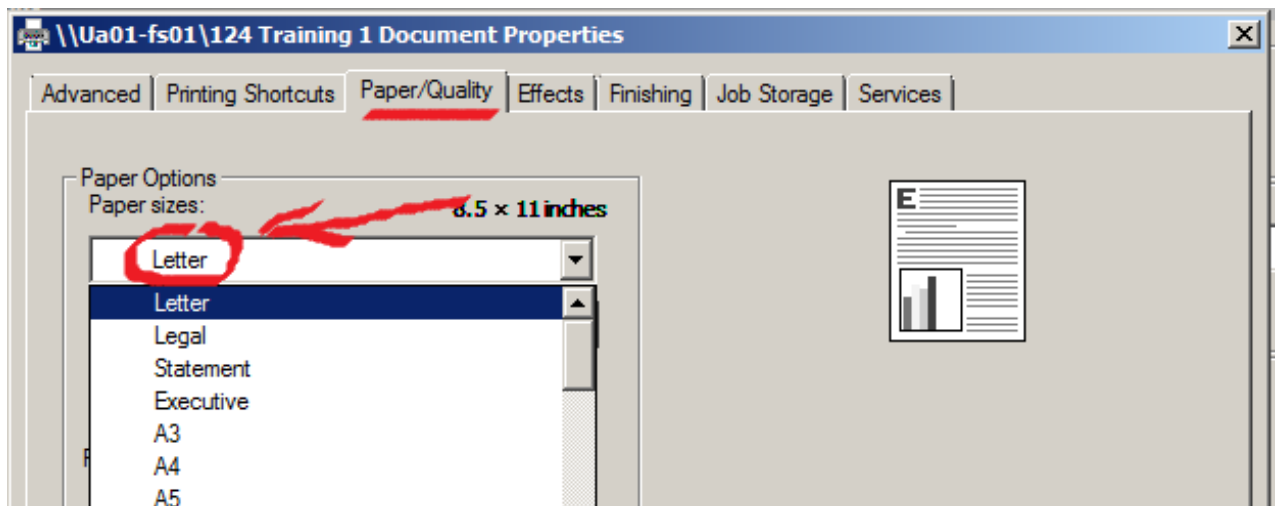

One of good ways to do that is to use flashcards. We made flashcards for words and phrases from our Pre-arrival language tool. You can print them out on any double-sided printer, cut them out and carry in your pocket to practice language anywhere you go. Use office cardboard paper for longer durability.

Follow these simple instructions to make sure the front and back side of your flashcards match.

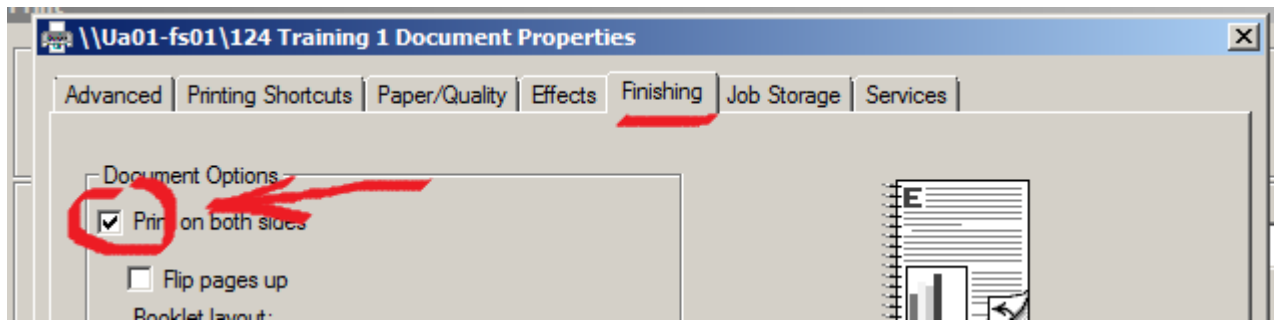

1. Open a PDF file and click on “Print” button

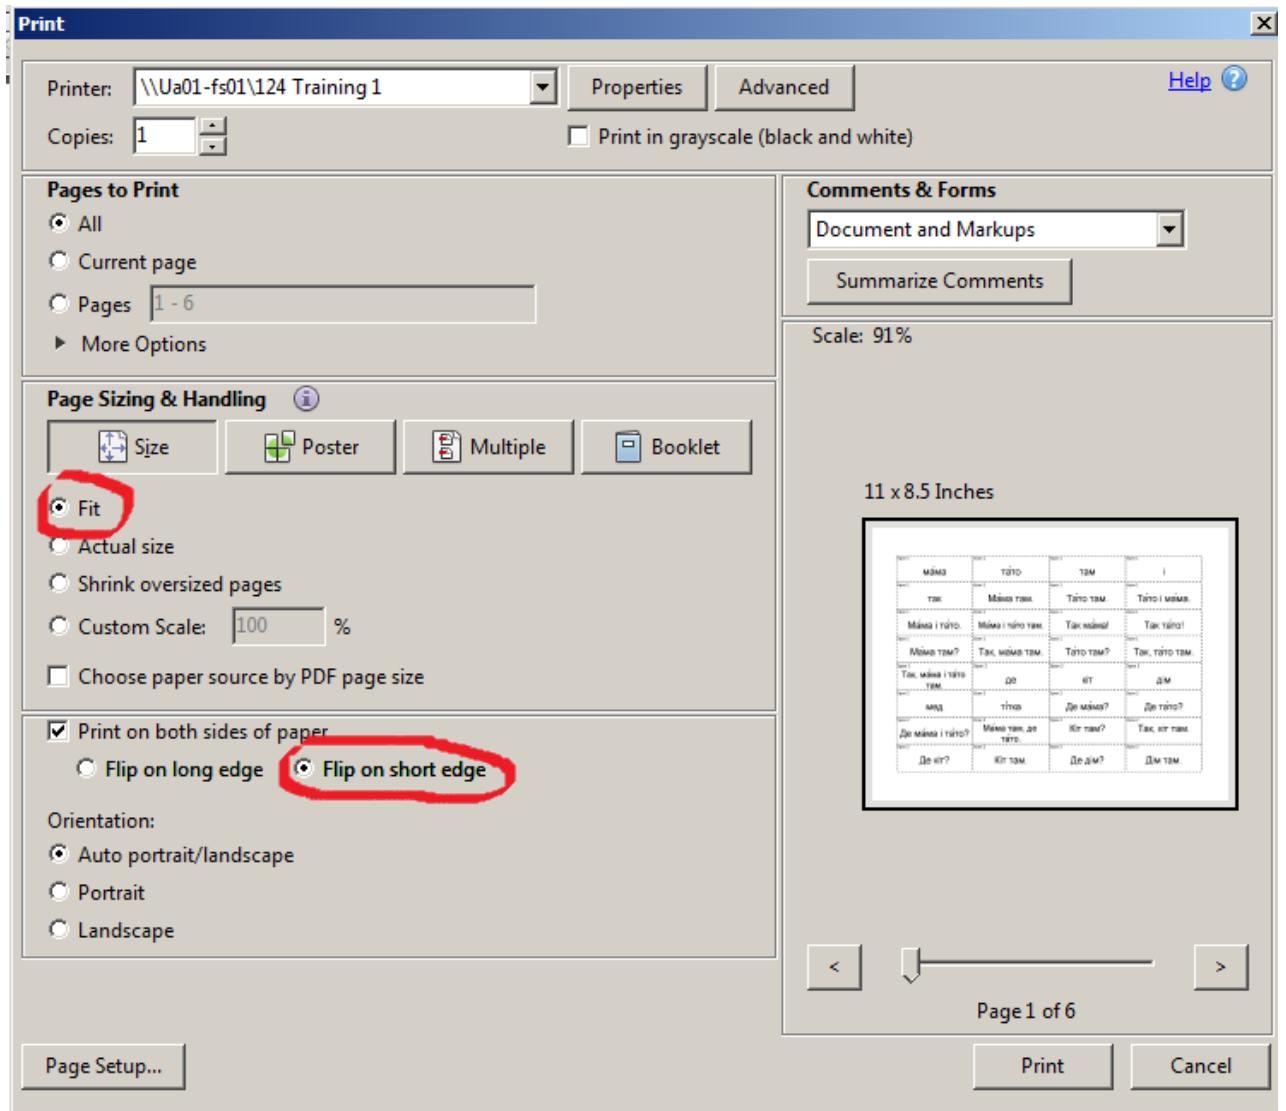

2. Go to “Properties”. Choose tab “Paper/Quality” and select type of paper you are printing on

3. Go to “Finishing” tab and put a check mark in “Print on both sides” box. Press “OK” to come back to “Print” window

4. Check boxes “Fit” and “Flip on short edge” and press “Print” button

5. If your printer does not have a double-sided printing option, you will need to print first only odd number pages and then insert them again and print even number pages. The way you insert paper depends on how your model of printer works.
6. Enjoy learning Ukrainian with our flashcards!
